

# WEBNODE CONTENT API

## 1. INTRODUCTION

Our registered partners can use Webnode Content API (following API) to let users put their content directly onto Webnode websites.

If you would like to use the power of our API, you can register at <http://developer.webnode.com/>. When your submission is processed you will receive an "api\_key" unique for each domain.

Westcom, s.r.o. reserves the right to refuse any submission or immediately cancel any partnership at our own discretion. A partner is liable for all damages caused by their content.

## 2. EXAMPLES

The partner puts HTML code into their website to allow users to apply Webnode content to their websites.

**Live example:** <http://developer.webnode.com/example/>

**Buttons:** <http://developer.webnode.com/downloads/>

**HTML example:** This example shows how to create a form with optional/required input fields:

```
<form name="WebnodeAddModule" method="post"
action="http://api.webnode.com/services">
  <input type="hidden" name="api_key" value="sh47qsUW6a7qyj9q" />
  <input type="hidden" name="api_version" value="1.0" />
  <input type="hidden" name="api_method" value="webnode.content.addModule" />
  <input type="hidden" name="module_name" value="Example widget" />
  <input type="hidden" name="module_description" value="Example widget
description" />
  <input type="hidden" name="module_url"
value="http://www.example.com/widgets/rssreader" />
  <input type="hidden" name="module_logo"
value="http://www.example.com/logo.jpg" />
  <textarea name="module_code" style="display: none;">

  <!-- Example widget code -->

  <embed pluginspage=http://www.adobe.com/go/getflashplayer
src="http://www.yourminis.com/Dir/GetContainer.api?
uri=yourminis/yourminis/mini:youtube" wmode="transparent" width="370"
height="280"
FlashVars="height=270&xheight=280&xwidth=370&width=360&uri=yourminis
%2Fyourminis%2Fmini%3Ayoutube&swfurl=%2Fwidget%5Fyoutube%2Eswf&"
type="application/x-shockwave-flash"
allowScriptAccess="always"></embed>

  </textarea>

  <input type="image" src="button.gif" border="0" value="addModule" Alt="Add to
Webnode" />
</form>
```
